- **Probiotic Air & Surface Purifier**
- Water Filtration System POU
- Lead-Free Faucet
- Water Filtration System POE
- **VOC Monitor**
- ♦ Under Bed & Bathroom
- Healthy Lighting
- ♥ UV Ice

Our SanctuousTM air filtration systems are designated to transform motor & sailing yachts into wellness sanctuaries. Whether new or retro-fitted, these systems provide an array of multi-layered, mineral-based and energy-efficient air purification benefits.

Our scent-delivery system uses advanced diffusion technology to convert plant-based liquid fragrance into dry vapor that integrates with new or existing ventilation systems. Scent output is entirely customizable to individual preference at various times of day or night.

Even on a yacht, allergens and other contaminants carried through air ducts can adversely affect the people aboard.

Our distribution system releases chemical-free, micron-size probiotics into the air to reduce foul odors, eliminate pollutants and vastly improve overall air quality.

This complete water filtration system provides clean, pure water for drinking, cooking and showering. It eliminates harmful organisms, filters 99% of heavy metals and water-born chemicals, and significantly reduces parasites, lead and bacteria.

Aromatherapeutic showers protect and nourish the body by eliminating harmful pollutants and hard-water deposits, then replacing them with an infusion of organic vitamin and collagen essences—providing a way to retain the skin's youthful glow on a daily basis.

Designed to adjust to the body's natural circadian rhythms, this revolutionary system utilizes smart technology to control light intensity and synchronize brightness levels with personal behavior patterns and productivity

In a world where organically grown whole foods offer long-term health benefits, "You are what you eat" is an adage more relevant than ever. That's why we've brought superfood rockstar David-Wolfe onto our Advisory Board, where he can offer insight into the longevity universe.
